THANDOKUHLE JINGELA

068 284 5690 | 25 Manton Cresent | thandokuhlejingela@gmail.com

ABOUT ME

Data Science & Analytics Graduate with an Advanced Diploma background in Business Intelligence. Proficient in end-to-end data pipelines–ranging from exploratory analysis and interactive Power BI dashboards to predictive machine learning (XGBoost, Scikit-Learn) and time-series forecasting (Prophet, ARIMA). Skilled in leveraging statistical modeling, RFM segmentation, and constrained optimization to turn complex datasets into actionable business strategies.

EDUCATION

Advance Diploma in ICT: Business Intelligence 2026
- Durban University of Technology

Diploma in ICT: Business Analysis 2023 – 2025
- Durban University of Technology

National Senior Certificate (NSC) 2017 – 2021
- St Francis College

WORK EXPERIENCE

Eyewear Consultant - Specsavers

October 2025 – Present

- Managed sales transactions and maintained accurate POS customer and product data within system databases.
- Analyzed customer requirements and vision profile data to recommend customized eyewear solutions, consistently driving customer satisfaction.
- Utilized interpersonal communication and problem-solving skills to resolve customer service queries efficiently.

PROJECTS

ShopTR Analytics — Predictive & Prescriptive Analytics

Tech Stack: Python, Scikit-Learn, XGBoost, Prophet, ARIMA, SHAP

- **Machine Learning:** Engineered customer behavioral features and trained XGBoost, Random Forest, and Logistic Regression models to predict churn, using SMOTE to handle class imbalance.
- **Forecasting & Optimization:** Built revenue forecasting models using Prophet and ARIMA, and designed a constrained optimization model to maximize discount allocations without hurting margins.
- **Model Evaluation:** Measured performance using ROC-AUC, Precision-Recall curves, and confusion matrices to drive targeted retention strategies.

ShopTR Analytics — Descriptive Analytics & BI Dashboard

Tech Stack: Power BI, Power Query, Excel, DAX

- **Data Pipeline:** Audited, cleaned, and transformed raw e-commerce records using IQR outlier detection and duplicate validation.
- **Analytics & Dashboarding:** Created RFM customer segmentations and developed an interactive Power BI dashboard featuring executive KPI tracking, dynamic slicers, and geographic trends.

TECHNICAL SKILLS

- **Data Science & Machine Learning:** Python (Pandas, Scikit-Learn, XGBoost, Statsmodels, Prophet, SHAP), Classification, Feature Engineering, SMOTE.
- **Data Analytics & BI:** SQL, Power BI, DAX, Power Query, Excel (PivotTables), EDA, RFM Segmentation.
- **Methodologies & Tools:** Time-Series Forecasting, Constrained Optimization, IQR Outlier Auditing, GitHub, Jupyter Notebook.
